

# Migrating Our Video Assets

## Global Architecture required for the pilot system

# A/V Hierarchy

Server	A/V Interface	A/V Application	Infrastructure
Production Quality (15 - 50 Mbps)		On Line Production	Broadcast
Intermediate Quality (3 - 15 Mbps)		EDL Creation Low Quality Editing	Broadcast Fibre Channel ATM
Low Bit Rate Browse (0.5 - 3 Mbps)		Rough EDL Creation Production Research	Hi speed LAN
Standard System with A/V Clips (< 1 Mbps)		Production Research	High Speed LAN Intranet
Standard System		Simple Research	Low Speed LAN Internet
